About

Third-year BTech Computer Science and Engineering student at The NorthCap University, specializing in Full-Stack development. Proficient in front-end technologies and back-end framework. Skilled in building and deploying web applications with strong problem-solving skills. Actively involved in hackathons, seeking opportunities to apply my skills and knowledge to real-world projects with the goal of becoming a software developer.

Skills

Languages: C, Java, Python, JavaScript, HTML, CSS, SQL

Technologies & Tools: spring, spring boot, Maven, Hibernate, Git, GitHub, VS Code, Spring Tool Suite, IntelliJ, Eclipse

Work Experience

Cognifyz Technologies Intern June, 2024 - July, 2024

- I have had the privilege to intern at Cognifyz Technologies, where I gained hands-on experience in web development as I worked on multiple development projects like creating a landing page and an Image gallery. This experience not only honed my technical skills but also helped me understand the industry better.

Education

General Raj's School - Delhi, India

The NorthCap University - Gurugram, India

Project Work

- **Shopping Website** (Java, JDBC, Servlets, SQL, HTML, CSS): Developed a web-based shopping website and implemented user authentication with cookies for login functionality. Designed booking interface with HTML and CSS and utilized java servlets for backend and SQL for database.
- **Inventory Management System** (Java, Spring Boot, MySQL, Postman, JDBC): Developed a backend application using java Spring Boot Framework and implemented custom RESTful APIs, Implemented all CRUD operations using Postman Tool and used JDBC for connection with MySQL Database Management System also used junit to check for various test cases and ensure the program is working properly.

Awards and Certificates

- Introduction to MongoDB by MongoDB
- Networking Basics by Cisco
